

May 11, 2020

Due to the ongoing impacts of cut through traffic and number of accidents in this area, along with resident support of the plan, beginning Monday, May 18, Reuben St. between Deliverance and Montabor drives will be closed for a six-month trial period to collect data and determine the impacts of the closure on neighboring streets. If the closure shows a favorable outcome, the Traffic Engineering Division will permanently close this one block section of Reuben Street to calm traffic in the neighborhood.

The initial closure will consist of large Type 3 barricades to prevent cut-through access between Montabar Drive and Deliverance Drive.

For more information on this matter, you may refer to the posted presentation given at the February 6th, 2020 neighborhood meeting, or you may contact me with any additional questions or concerns you may have. Thank you and stay safe and well!

Respectfully,

Erin Purcell
Engineering Technician II
